

OTTER · \$OTR

Hold paws. Never drift.

A community-led meme token on BNB Smart Chain

Fixed supply · 1,000,000,000 OTR · Pre-launch

One animal. One raft. One unmistakable meme.

- Community-led meme token on **BNB Smart Chain**, built on one social instinct: otters hold paws at rest so the current can't pull them apart
- No yield protocol, no revenue claim, no promise of profit. Fixed supply, and value that depends on culture, community and open-market demand
- The mascot is a hooded otter carrying diamond paws through a restless sea. The community calls itself the raft

The meme is the product. The raft is the network.

Cute enough to spread. Strong enough to remember.

01

Instant recognition

Globally recognizable, expressive, naturally memeable.

02

Built-in metaphor

Holding paws isn't manufactured lore. It's already how people understand otters.

03

Dual personality

Soft and cute on the surface, resilient and fierce underneath.

04

Endless range

Oceans, rafts, waves, shells, diamond paws and community rituals.

\$OTR on BNB Smart Chain

Field	Value	Field	Value
Token name	Otter	Total supply	1,000,000,000 OTR
Symbol	OTR	Decimals	18
Network	BNB Smart Chain (chain ID 56)	Supply state	Fixed at deployment, no external mint function observed
Standard	BEP-20 / ERC-20 compatible	Contract	0xf81ea2Db2e8C9824E2EC6303b049891Ed47b2e8b

Always verify the contract on BscScan before interacting.

Simple code. Public state. No hidden mythology.

Pre-launch note

Full supply currently sits in the owner address. Ownership not yet renounced, public DEX liquidity not yet detected – verify onchain when announced.

Fixed supply

1 billion OTR, no public mint function observed.

Burnable

Holders can permanently burn their own tokens; approved balances burnable via burnFrom.

No embedded tax

No adjustable buy/sell fee or transfer-tax interface observed.

No blacklist or pause

No blacklist, trading pause or wallet-freeze interface observed.

A social object for the raft

Holding is the signal. Making things is how the raft keeps moving.

Identity

Hold \$OTR as an open, onchain signal that you're part of the raft.

Culture

Recurring lore around paws, rafts, waves, shells and the Great Otter.

Participation

Challenges, memes, spaces and campaigns turn holders into contributors.

Recognition

Celebrate artists, meme makers and community hosts.

The current, the launch and the long swim

No roadmap PDFs. This is direction, not a dated promise.

Now

Finalize website and links, publish launch distribution and liquidity details, align all comms on the verified contract.

The long swim

Recurring community-led content seasons, selective partnerships, experiments in collectibles, games or social tools.

1

2

3

At launch

Open transparent public trading, publish liquidity and ownership transaction links, run the first "Join the Raft" campaign.

Memes are fun. Risk is real.

Concentration risk

Full supply currently sits in the owner address before launch distribution.

Market and launch risk

No price floor and no redemption right. Liquidity and ownership actions aren't yet complete.

Smart-contract and execution risk

Public bytecode doesn't eliminate bugs, phishing or integration failures, and future plans may not materialize.

What \$OTR is not

A meme token, not equity, debt, or a claim on revenue. Nothing here is financial, legal or tax advice.
