

OTTER

\$OTR MEME PAPER

Hold Paws. Never Drift.

NETWORK	ONCHAIN TICKER	VERSION
BNB Smart Chain	OTR	Pre-Launch v1.0 · Sep 2026

Official contract

0xf81ea2Db2e8C9824E2EC6303b049891Ed47b2e8b

Community name: OTTER · Official onchain ticker: \$OTR

One animal. One raft. One unmistakable meme.

OTTER is a community-led meme token built around the internet's favorite chaotic-cute aquatic animal and one simple social instinct: stay together.

HOLD PAWS. NEVER DRIFT.

The OTTER rule

Otters are curious, playful and relentlessly social. At rest, they famously hold paws so the current cannot pull them apart. OTTER turns that image into a crypto-native identity: a raft of people who make, share, laugh and move together.

This is not a yield protocol, a revenue claim or a promise of future profit. \$OTR is a fixed-supply meme token on BNB Smart Chain. Its value, relevance and longevity depend on culture, community participation and open-market demand.

The mascot

A hooded otter carrying diamond paws through a restless sea.

The community

A "raft" — the real-world term for a group of otters floating together.

The signal

A simple phrase anyone can repeat: Hold Paws. Never Drift.

The product

A liquid, transferable social token for a meme people want to belong to.

The meme is the product. The raft is the network.

Cute enough to spread. Strong enough to remember.

WHY OTTERS WORK

Instant recognition

Otters are globally recognizable, expressive and naturally memeable.

Built-in social metaphor

Holding paws is not manufactured lore; it is already how people understand otters.

Dual personality

Soft and cute on the surface, resilient and surprisingly fierce underneath.

Endless creative range

Ocean, rivers, rafts, waves, shells, fish, diamond paws and community rituals.

THE GREAT OTTER

Diamond paws. Calm eyes. Rough water.

“The internet’s favorite chaotic-cute animal finally has a coin.”

Official launch message · 16 Sep 2026

A brand built for participation, not spectators.

THE VISUAL LANGUAGE

Deep ocean navy

Trust, depth and the calm beneath market noise.

Electric teal

Water, energy and high-visibility digital culture.

Shell gold

Warmth, collectibility and classic meme-coin swagger.

Diamond paws

A playful symbol of conviction — never financial advice.

The chain

Connection between holders, creators and communities.

The wave

Markets move. The raft stays connected.

VOICE

Short, confident and self-aware. OTTER speaks in memes, not corporate jargon. Cute without becoming childish; bold without pretending a meme token is a bank, a fund or a guaranteed investment.

\$OTR on BNB Smart Chain

The community name is OTTER. The deployed contract uses OTR as its official token symbol. Always verify the contract address before interacting.

ONCHAIN SNAPSHOT

Token name	Otter
Symbol	OTR
Network	BNB Smart Chain (chain ID 56)
Token standard	BEP-20 / ERC-20 compatible
Total supply	1,000,000,000 OTR
Decimals	18
Contract	0xf81ea2Db2e8C9824E2EC6303b049891Ed47b2e8b
Supply model	Fixed at deployment; no external mint function observed

WHY BNB SMART CHAIN

Accessible

Low-friction transactions make small community actions practical.

Liquid culture

BNB Chain has a large, retail-native trading and meme community.

Compatible

The token follows the familiar ERC-20 interaction model used by wallets and DEXs.

Verifiable

Supply, ownership and transfers are publicly inspectable onchain.

[Verify the contract on BscScan](#)

Simple code. Public state. No hidden mythology.

The following describes the deployed runtime bytecode and live contract state observed on 16 September 2026. It is not an audit.

Fixed supply

1 billion OTR exists. No public mint function was observed.

Permit support

EIP-2612-style signatures can authorize allowances without a separate approval transaction.

No blacklist / pause

No blacklist, trading pause or wallet-freeze interface was observed.

Burnable

Holders can permanently burn their own tokens; approved balances can be burned via burnFrom.

No embedded tax

No adjustable buy/sell fee or transfer-tax interface was observed.

Ownable

The contract retains an owner that can transfer or renounce ownership; no owner mint function was observed.

PRE-LAUNCH DISCLOSURE

At publication, the full 1,000,000,000 OTR supply remains in the owner address **0x4b44882f4adae3730b6af0f69a88f040067bfe8a**. Ownership has not been renounced, and public DEX liquidity has not yet been detected. Launch distribution, liquidity provisioning and any lock or burn transactions should be verified onchain when announced.

Do not trust tickers, screenshots or copied links. Trust the contract address.

A social object for the raft.

Meme coins become meaningful when people use them to coordinate attention, identity and creative energy. OTTER begins there — without manufacturing fake utility.

Identity

Hold \$OTR as an open, onchain signal that you are part of the raft.

Recognition

Celebrate artists, meme makers, community hosts and the people who keep the raft moving.

Participation

Use community challenges, memes, spaces and campaigns to turn holders into contributors.

Culture

Build recurring lore around paws, rafts, waves, shells and the Great Otter.

DESIGN PRINCIPLES

01

Meme first — Every activation should be understandable in seconds and shareable without explanation.

02

Community visible — The official account amplifies creators instead of speaking like a faceless company.

03

No forced utility — New features must earn their place; complexity is not progress.

04

Onchain proof — Important launch, liquidity, lock, burn and ownership claims should link to transactions.

The current, the launch and the long swim.

The official X launch message deliberately says “no roadmap PDFs.” This page is therefore a working direction for the community, not a dated promise or guarantee.

NOW	AT LAUNCH	THE LONG SWIM
• Finalize website and official links • Publish launch distribution and liquidity details • Align all communications on \$OTR and the verified contract • Seed the visual universe and meme library	• Open transparent public trading • Publish liquidity and ownership transaction links • Run the first “Join the Raft” campaign • Activate creators, community spaces and meme contests	• Recurring community-led content seasons • Selective partnerships that fit the character • Experiments in collectibles, games or social tools • Let the strongest community behavior shape what comes next

THE TEST FOR EVERY IDEA

Does it make the otter more recognizable, the meme more shareable, or the raft more connected?

If not, let it drift away.

OTTER will not measure success by roadmap buzzwords. The useful measures are participation, organic reach, holder distribution, liquidity quality, repeat creators and whether people still say the line when the market is quiet.

Memes are fun. Risk is real.

Crypto assets are volatile and experimental. \$OTR may lose substantial or all value. Participation should be informed, voluntary and limited to what a person can afford to lose.

Market risk

Price and liquidity can change rapidly; there is no price floor or redemption right.

Launch risk

Liquidity, allocation and ownership actions are not complete at this pre-launch stage.

Regulatory risk

Crypto rules differ by jurisdiction and may change.

Concentration risk

The full supply is concentrated in the owner address before launch distribution.

Smart-contract risk

Public bytecode does not eliminate bugs, wallet errors, phishing or integration failures.

Execution risk

Community attention, partnerships and future experiments may not materialize.

LEGAL CHARACTER

\$OTR is presented as a community meme token. It does not represent equity, debt, ownership in a company, a claim on revenue, a right to dividends, a promise of appreciation, or a guaranteed entitlement to products or services. Nothing in this document is financial, legal or tax advice, an offer of securities, or a solicitation to invest.

This document describes intentions and observed onchain facts at the publication date. Community direction may change. Contract state, ownership, balances and liquidity should always be checked directly onchain.

09 · JOIN THE RAFT

The current moves. We hold paws.

BUILT TO FLOAT. NEVER TO DRIFT.
